This is an overview of what will happen once you start the install procedure.

Location

Set timezone to Europe/Berlin.

The system language will be set to American English (United States).

The numbers and dates locale will be set to Deutsch (Deutschland).

Keyboard

Set keyboard model to Generic 105-key PC.

Set keyboard layout to English (US)/Default.

Partitions

Erase disk `/dev/sda` (VBOX HARDDISK) and install EndeavourOS.

Current:

sda1

300.00 MiB FAT32

Arch Linux (rolling)

29.73 GiB ext4

After:

EFI system

300.00 MiB FAT32

EndeavourOS

18.53 GiB ext4

swap

11.20 GiB swap

Create new **GPT** partition table on `/dev/sda` (VBOX HARDDISK).

Create new **300MiB** partition on `/dev/sda` (VBOX HARDDISK).

Flag 300MiB **fat32** partition as **boot**.

Create new **18973MiB** partition on `/dev/sda` (VBOX HARDDISK) with entries **root**.

Create new **11466MiB** partition on `/dev/sda` (VBOX HARDDISK).

Set up **new** fat32 partition with mount point **/boot/efi**.

Install EndeavourOS on **new** ext4 system partition.
